Mental
Health

In today's fast-paced and digitally connected world, mental well-being has become more crucial than ever before

Despite growing awareness, millions still struggle with mental health challenges, often facing barriers to access effective care

Our team has worked to make an AI project that gives you personalized mental wellbeing advice based on your present emotions to help you live a better life.

What Is moodify?

moodify is a python based mood tracking journal app

It makes use of sliders to allow you to accurately define your emotions and returns a customized response depending on your input

We offer an interactive and responsive method to reflect on your feelings and emotions throughout the year...

Demo!

Thank you :D
